MAP:

You are going to make a map that shows, in pictures what each section of the country wants.

This is going to be a visual aid that will show that you have knowledge of what each section, North, South and West, wanted for themselves over all others.

1. Be sure that you DRAW what they are wanting. No matter if it a tariff, or a road or what they grew.
2. It must be in color! Make this a colorful map.
3. USE THE SPACE: Fill in the area of the map with these pictures, so you are going to want to think about your layout before you start.
4. You are graded on:
  - a. Accuracy-10points: Did you get all economy and wants?
  - b. Art: 10 points: Did you DRAW your items? You can use labels, but you must DRAW them.
  - c. Color: 5 points: Did you use color on all art work and labels?
  - d. Use of area: 5 Points: Did you reasonably fill the space provided?

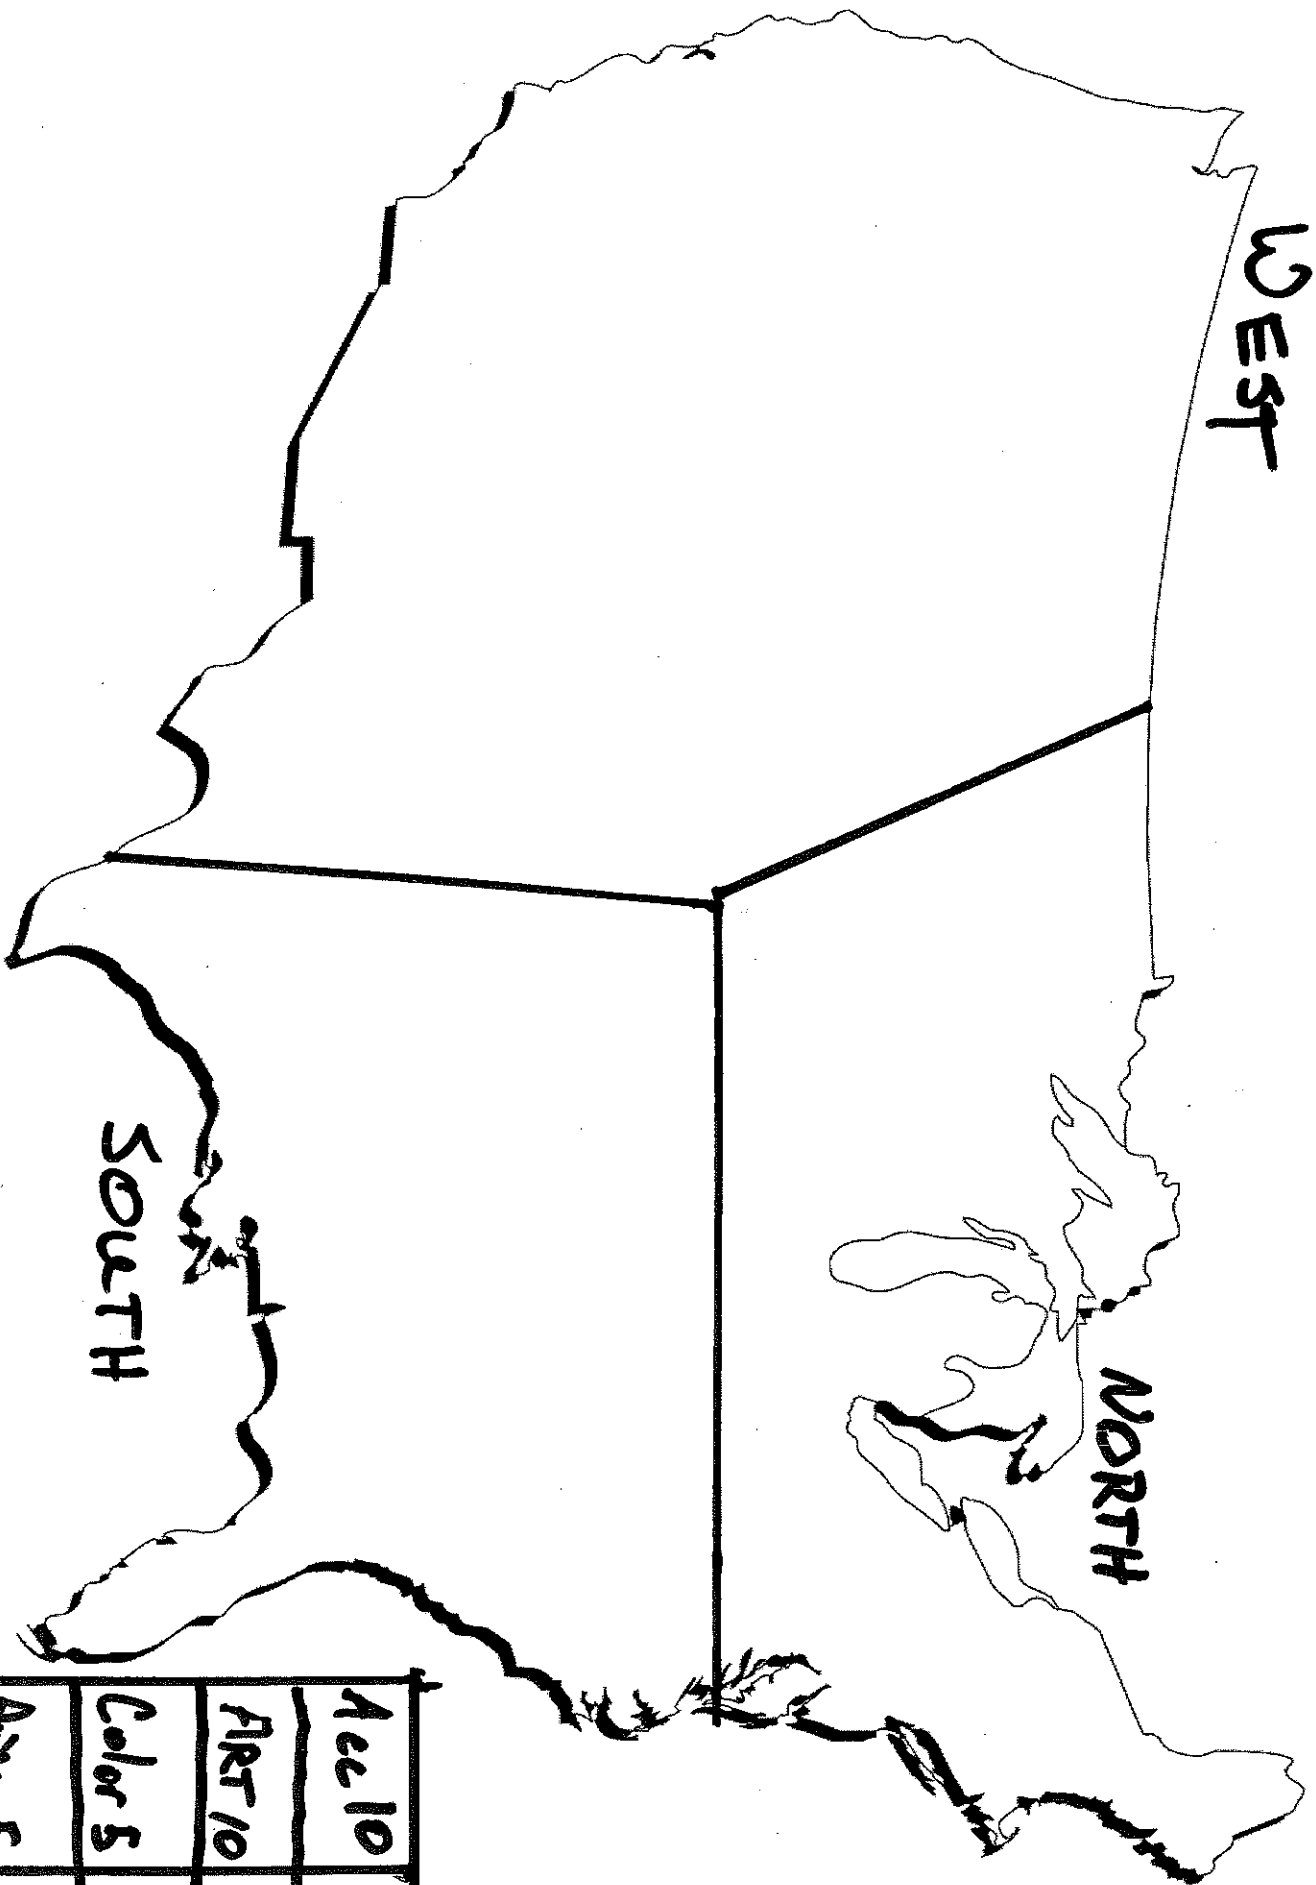

TOTAL: 30
